# Energy Efficiency Watch – Polish roundtable

## Date & location:
30th June 2020, Warsaw-Serock, Poland

## Organiser(s):
Energy Cities and Polish Network of Energy Cities (PNEC)

## Summary of the event
This Polish municipal roundtable dates reported – was ultimately organised in the framework of PNEC’s annual conference in a hybrid format; with a good participation of Polish municipalities attending the event physically with international speakers online.

## Objective & main programme point
This session was seeking to take stock of the implementation of national energy efficiency policies in Polish municipalities and seeking successful municipal narratives and stories on how to keep up with energy efficiency investments and moving on with the energy transition in the unprecedented context of the pandemic.

## Conclusions
Although the first wave of the pandemic hit seriously Polish municipalities (both their human and financial resources had to be re-shifted and several non-critical investments were put on hold); some municipalities reported on improved agility, moving their governance online, accelerating e-governance and taking an opportunity of continued investments or energy efficiency audits in temporarily non-utilised public buildings (eg. schools or kindergardens).

## Programme

<table>
<thead>
<tr>
<th>Time</th>
<th>Session</th>
