This hybrid workshop – taking place ‘live’ in Sofia and on Zoom - in the framework of the Bulgarian Sustainable Energy Investment Forum (SMAFIN) is attracting members of the EcoEnergy network and municipalities beyond. The event has a double purpose: taking stock of Bulgarian energy efficiency policies while providing municipalities with extensive opportunity to exchange on financing and gather feedback for the EEW4 narratives development via poll questions on Zoom and discussions. Results of the EU27 wide Energy Efficiency Watch survey will be presented and discussed in this session, aiming to gather input for supporting narratives for the local energy transition.

*\*So-called "narratives" combine several arguments and are supported by a larger number of actors. The objective of developing and spreading such narratives is often to gain wider support for a political movement, a policy or even a change in society, such as the energy transition policies. Often, these narrative are "stories" which combine facts and the ability to trigger emotions.*
